About North Sichuan Medical University

Extensively covering an area of more than 823,693 square meters, the college encourages both home and overseas enrolments, such that it has over 15000 students pursuing higher education within its two campuses.

NSMC comprises of 12 undergraduate and graduate programs, nine affiliated hospitals, two clinical hospitals and more than 35 teaching hospitals. Students who are keen to study mbbs in china will find this college fitting as it gives comprehensive pedagogic experience through its advanced academic curriculum. Biochemistry, dentistry, psychology, Anatomy, surgery, forensic medicine, physiology, microbiology, E.N.T, pathology, embryology, obstetrics & gynaecology, diagnostics, pharmacology, ophthalmology, preventive medicine and pediatrics, dermatology, are some of the courses covered under MBBS graduate programs.

Guided by the motto, "Commitment, Fraternity, Honesty, and Creativity", NSMC has developed into a significant national and provincial base of higher medical education of all the medical universities in china, as well as for disease prevention, and treatment for rheumatism ever since it was founded in 1951. From the time of its inception till date, the college has rapidly evolved and emerged as the best medical university in china as well as in recent times has taken the responsibility of more than 5 national research projects, project works from the Ministry of Public Health, Ministry of Education and State Chinese Medicine Administration, and over 200 provincial major and scientific research developments. The college is most reliable, particularly to study mbbs in china for indian students, as it is mainly vouched for exceptional infrastructure, well-equipped library, hostel facilities, healthy food options and global environments. What makes NSMC stand out from the rest of top mbbs universities in china is that it focuses mainly on research works and innovative talents. In that way, the college has been quite successful in publishing over 3000 scientific research papers, more than 55 treatise; among these more than 50 papers have been represented by ET and SCI.
